Journal of David Livingstone
beginning 14th August 1872 at
Unyanyembe two days after
the men procured by M^r Stanley
had arrived

15th I have prepared the loads for the men
and gave each five dotis to act as carriers
For the extra loads we shall get Banyamwezi
pagazi.

16th favourable reports of the results of
treating jungle fever by hipposulphat of
soda come from India - quicker cures
than with quinine - the native remedy
Lettagootie also effectual

17th Getting ready and sending for Pagazi
18th go over to say Good by to Sultan bin Ali & to
others and leave goods for the return journey
four bales calico, cartridges full & empty &c

19th Pagazi expected to come today also the
permission to a chiongosi to go with us -

24th delay as usual by the want of Pagazi
All those available are collected for the
war with Mirambo - I have got some but
still need seven - one of the soldiers was
firing off cartridges contrary to orders
and when reproved by Manna Sera the
headman he gave him a severe cut on the
head 2 inches long & deep and a shot
in the forearm - called all hands and
made each give him a beating - some were
too gentle and I laid my stick on their backs
